GMR ENLIGHTS

Available versions

rev. 2025.07

The classic lighting fixtures can be equipped with a die-cast aluminum decorative ring.
The decorative ring has a purely aesthetic value.

Below are the models of the lighting fixture with and without this option and the relative coding.

Without decorative ring version
Product code: GAMS S_GFxx_Q

With decorative ring version
Product code: GAMS F_GFxx_Q

Lighting fixture features

General features

Power source:	120-277V | 50/60Hz | tolerance +/-10%
Current supply:	350 mA | 525 mA |700 mA | 1050 mA (P_{max} = 78W)
Power Factor | THD:	≥0.95 | <10 % (At full load)
Expected life (Ta=77°F|25°C):	> 100.000 h | L90B10
Operational temperature (Ta):	T_{min} = -40°F (-40°C) T_{max} = 131°F (55°C) |700 mA 104°F (40°C) |1050 mA
Storage temperature:	-40°F/+176°F (-40°C/+80°C)
Overcharge protection:	Main surge immunity up to 10kV
Disconnector:	Disconnector and cable clamp | cross section AWG14 ÷ AWG6
Standard functions: *(page: Functionality)*	Current fixed |Virtual midnight |CLO

Materials

Lighting fixture:	Die cast aluminium | EN1706 Epoxy powder coating
Optical system:	Optics in PMMA
Gaskets:	Removable silicon
Cable gland:	Polyamide PA66 | PG16 | Ø 0,55in (14mm) MAX
Screws and bolts:	AISI 304 stainless steel
Fixture color:	Others on request
Diffusers color:	Transparent | Frosted

LED features

LED data 4.000 K - 640mA:	722 lm/LED | 186 lm/W| 77°F (25°C) [Tj] | ≤ 3 step MacAdam
Color temperature:	2.200 K | 2.700 | 3.000 K | 4.000 K | CRI ≥ 70

Additional surge protector device:
SPD | Max peak current 10kV
8/20µs

Additional surge protector device SPD 400:
SPD | Max peak current 10kV 8/20µs + permanent overvoltage protection higher than 270Vac

Optional functions:
1,64ft (0,5m) power cable with 2-3 or 4-5 core connector

Funzionalità su richiesta:
DALI2 | D4i

Connectors and sockets:
NM (Nema Socket) | ZS Zhaga Socket

Photometric data | LED modules nominal data

rev. 2025.07

The LED modules nominal data refers only to the LED light sources in a standard version, with 4000 K color temperature, color rendering index CRI 70 min. and a junction temperature tj of 77°F (25°C). The LED nominal data are extrapolated from the manufacturer documentations.

LED code

	I LED [mA]	Luminous flux [lm]	LED Power [W]	Efficiency [lm/W]
GF03	350	2413	11,5	210
	525	3537	17,6	201

Photometric data | Lighting fixture measured data

GMR ENLIGHTS

rev. 2025.07

The lighting fixture measured data refers to GMR ENLIGHTS products in a standard version, with 4000 K color temperature and an ambient temperature ta of 77°F (25°C).

GMR ENLIGHTS offers the possibility of driving the device with custom currents (•).

In case of optional glass some LED codes my be different from those indicated (GL02, GL04, GL06). In this case the values of luminous flux and efficiency are different from those shown in the table.

Order code: GAMS S_GFxx_Q GAMS F_GFxx_Q		I LED [mA]	I lighting fixture [mA]	Luminous flux [lm]	LED Power [W]	Efficiency [lm/W]
GF03		175	350	2140	13,5	159
		265	525	3137	20,5	153
		350	700	4079	27,0	151
		525	1050	5899	40,5	146
GF04		175	350	2799	17,5	160
		265	525	4126	26,5	159
		350	700	5400	35,0	154
		525	1050	7569	53,0	143
GF06		175	350	4132	26,0	159
		265	525	6079	38,5	158
		350	700	7709	51,5	150
		525	1050	10438	78,5	133

Tk CONVERSION FACTOR LUMINOUS FLUX

(**) See pag: Technical data, to check the colour temperatureb availability.

Functions

rev. 2025.07

Standard functionality

Fixed current
During production, the light fixture is pre-set with a fixed current amongst the standard settings that appear in the tables on page 3. Upon customer's request, it is also possible to set a specific current (custom setting).

Virtual Midnight | Automatic dimming
The driver is programmed to automatically dim the light output according to the time. As required by regulations, the maximum output is set during initial hours and towards the end of the light fixture's operating time interval. During these hours there is statistically more traffic. The light output is then dimmed during the central hours of the operating time interval. This management is achievable through a self-learning process of the device, that establishes the centre point of the time interval. This moment is called "virtual midnight" and it is the point that the dimming profile refers to in order to know when to reduce the light output. We can manage up to 8hrs of programming that evolve around the virtual midnight and up to 5 steps of dimming. This way the light output will adjust automatically, adapting throughout the year to the duration of the nighttime, by referring to the pre-set parameters based on the centre point of the operating time interval.

CLO Constant Lumen Output
LEDs over time are inevitably subject to performance depreciation. This light reduction may be compensated by gradually increasing the LED's current during its lifespan, this corresponds to a gradual increase of lumen output proportional to the amount that is naturally depreciated.

On request functionality

DALI2 Control and monitoring system
On request, the fixture can be fitted with a DALI2 communication interface. This protocol allows it to be monitored and controlled remotely through use of Dali control buses.

D4i
On request, the fixture can be equipped with a D4i certified power supply. This is the ideal solution for wireless sensors and/or controls. This system was developed to integrate various systems to address smart city requirements. Included is DALI2 protocol + auxiliary power (AUX) to supply power to devices and sensors. This system is usually required when using a Zhaga socket.

LINESWITCH
This functionality by using an extra wire within the streetlight's power line, allows to dimmer to a pre-set level. For example, a centralised timer can change this value from 100% to 50%, and vice versa.

AMPDIM
This feature allows dimming using the power line controlled by an upstream flow regulator. For this feature, the flow controller must use amplitude modulation (AM).

NEMA | Nema Socket (7 PIN)
The Nema Socket is a 7 PIN connector/socket with IP66 rating, that is fitted on the fixture to make it interfaceable with various ANSI C136 compliant devices and remote-control gear.
These devices can be installed during or after installation of the light fixtures. The NEMA socket can provide power interruption and is interfaceable with DALI buses and/or 1-10V dimming. It is compatible with point-to-point node connection, and twilight sensors ect.

ZHAGA Zhaga Socket (4 PIN)
The Zhaga socket is a small and compact 4 Pin connector/socket, that is fits ideally with the design of GMR ENLIGHTS fixtures. With ZHAGA sockets it is possible install the devices, sensors, ZHAGA remote controls during or after installation of the light fixtures. This socket is usually required in conjunction with the DALI Sensor feature, which involves a DALI2/D4i communication protocol in addition to 12/24V auxiliary port to supply power to the sensors. It is compatible with point-to-point wireless control solutions and SMART CITY applications to control and monitor the public lighting infrastructure.

PRESENCE SENSOR
The product can be equipped with a presence sensor type zhaga book 18 in the lower part of the luminaire. In this case the lighting body is provided with Zhaga socket and Driver D4I. It is very important to carefully evaluate the installation context (height and underlying area) according to the sensing diagram of the device.

Third-party remote control
GMR ENLIGHTS fixtures are compatible with most third-party remote controls, powerline communication systems, wired systems (buses) and wireless systems.
