

VESTA B

The pictures shown are for illustrative purposes only. For shape, material and color specifications refer to internal descriptions.

Vesta B

Technical data

ACCESSIBILITY

Timeless

Tool-free openable fixture. Replaceable internal components without the need of tools.

OPTICAL TECHNOLOGY

Glossed

The refracting optical system consists of a single-chip LED, PMMA lenses with a 30-year warranty against UV exposure and yellowing due to aging, a high-purity (99.7%) aluminum reflector, and extra-clear tempered glass.

Scale: 1:10

SPECIFICATIONS

Input voltage:	120-277V 50/60Hz tolerance +/-10%
Driver current:	350 mA 525 mA 700 mA 1050 mA (P _{max} = 129W)
Power Factor THD:	≥0.95 <10 % (At full load)
Rated life:	>100,000 hours, L90B10 at 77°F (25°C), 350mA
Operational temperature:	T _{min} = -40°F (-40°C) T _{max} = 131°F (55°C) 700 mA 122°F (50°C) 1050 mA
Storage temperature:	-40°F/+176°F (-40°C/+80°C)
Built-in surge protection:	Up to 10kV
Standard functions:	Constant Current Virtual midnight

CONSTRUCTION

Housing construction:	Die cast aluminium EN1706
Optical system:	PMMA lenses and aluminum reflector with 99.7% purity, anodized and polished.
Underside glass panel:	Black Screen-Printed Tempered Glass with transparent LED area 4mm thickness
Gaskets:	Removable silicon
Cable gland:	Polyamide PA66 M20 Ø 0.55in (14mm) MAX
Fasteners:	Stainless Steel (AISI 304)
Housing finish:	GMR Light Grey Custom colors on request

LED FEATURES

LED performance at 4000 K, 640 mA:	700 lm per LED 181 lm/W T _j = 77°F (25°C) ≤ 3 SDCM (MacAdam steps)
Color temperature:	3000 K & 4000 K with CRI 70 standard.

OPTIONS

LED color temperature:	2200K, 2700K, and higher CRI options (e.g., CRI 80) available upon request, along with higher temperature options.
Additional surge protection device (SPD):	Rated for 20 kV / 10 kA, 8/20 µs waveform
Electrical disconnect:	Internal electrical disconnecter that automatically interrupts power when the luminaire is opened for maintenance. Cross-section AWG14 to AWG6
Additional electrical equipment:	DALI2 D4i
Control interface and sensor options:	NM (Nema Socket) Photocell 10LX-60LX (NM)

Type I M

The measured data for the lighting fixture is based on the standard configuration of GMR ENLIGHTS products (CRI 70) at an ambient temperature of 77°F (25°C). Other currents are available in 50mA steps, ranging from 200mA up to 1050mA, where applicable.

Feature availability may vary based on product configuration. Upon request, additional color temperature options beyond the standard 3000K and 4000K listed in the table, as well as alternative CRI selections, are available.

Type III M

The measured data for the lighting fixture is based on the standard configuration of GMR ENLIGHTS products (CRI 70) at an ambient temperature of 77°F (25°C). Other currents are available in 50mA steps, ranging from 200mA up to 1050mA, where applicable.

Feature availability may vary based on product configuration. Upon request, additional color temperature options beyond the standard 3000K and 4000K listed in the table, as well as alternative CRI selections, are available.

Functions

Standard functionality

CONSTANT CURRENT

During production, the fixture is pre-set with a fixed constant current selected from the standard settings listed in the tables on page 3. Upon request, it is also possible to configure a custom current, in 50mA steps, ranging from 200mA to 1050mA where applicable

VIRTUAL MIDNIGHT | AUTOMATIC DIMMING

The driver is programmed to automatically dim the light output according to the time. As required by regulations, the maximum output is set during initial hours and towards the end of the light fixture's operating time interval. During these hours there is statistically more traffic. The light output is then dimmed during the central hours of the operating time interval. This management is achievable through a self-learning process of the device, that establishes the centre point of the time interval. This moment is called "virtual midnight" and it is the point that the dimming profile refers to in order to know when to reduce the light output. We can manage up to 8hrs of programming that evolve around the virtual midnight and up to 5 steps of dimming. This way the light output will adjust automatically, adapting throughout the year to the duration of the nighttime, by referring to the pre-set parameters based on the centre point of the operating time interval.

On request functionality

NEMA | Nema Socket (7 PIN)

The Nema Socket is a 7 PIN connector/socket with IP66 rating, that is fitted on the fixture to make it interfaceable with various ANSI C136 compliant devices and remote-control gear.

These devices can be installed during or after installation of the light fixtures. The NEMA socket can provide power interruption and is interfaceable with DALI buses and/or 1-10V dimming. It is compatible with point-to-point node connection, and twilight sensors ect.

PHOTOCONTROL SENSOR

The product can be equipped with a photocontrol sensor, which is installed directly on the luminaire. This sensor automatically controls the lighting based on ambient light levels, ensuring energy-efficient operation. The installation should consider the height and surroundings for optimal performance.

Example of 4-step adjustment with virtual midnight

7 Pin Nema Socket 7 (A) and IP66 shorting cap (B)
